

Stand-By Power Fueling Program

The Right Fuel When You Need It

When stand-by power is needed, your generator can't be out of diesel fuel. It also must have a high quality diesel fuel that will run trouble free. We now can guarantee fuel when you need it and supply a specially formulated diesel fuel with **BioGuard Plus 6™** that will run when you need it.

Fuel When You Need It

With our Stand-By Power Fueling program we guarantee deliveries to keep your generator running until power is restored.

Guaranteed Fuel Supply

When you need fuel it will be there! With our supply capacity, delivery equipment and manpower, we will service your stand-by power generator until normal power is restored.

Competitive Pricing

When disaster hits, fuel prices spike. With our Stand-By Power Fueling program, our price will be consistent with the market conditions. No exhorbedent pricing!

The Right Fuel to Keep the Power On

Today's ultra low sulfur diesel (and biodiesel) is very unstable and is susceptible to bacteria growth when stored for any length of time. Bacteria and sludge from unstable fuel cause plugged fuel filters that will shut the generator down. Our generator grade diesel fuel will be treated with **BioGuard Plus 6™** that is specially formulated to:

- Prevent Bacteria Growth
- Stabilize the Fuel for Up to 2 Years
- Prevent Sludge and Plugged Fuel Filters
- Keep Your Generator Running When You Need it
